

Locks and Bollards

Purpose: To provide reasonable and necessary access to stakeholders along the Eastern Trail corridor.

All locks and bollards utilized by Eastern Trail Management District (ETMD) and the corresponding municipalities will be as follows:

**Master Lock #3810 – long shank
Double hinged collapsible Bollard – see attached specifications
Double locking Pin – Traffic Guard – see attached specifications**

At the time of construction, ETMD will ensure that all parties are advised of locations of ETMD locks and receive a set of keys. Such parties consist of, but are not limited to, trail operations crews, emergency services, all Federal, State and municipal agencies requiring access, Unitil (GSGT) as the principal utility covering the trail route and any additional utilities or stakeholders.

Management of the keys and access will be covered directly by each municipality as the trail is constructed with the corresponding ETMD trustee as primary contact person and the ETMD President and Executive Director as secondary contact.

President	Bob Hamblen	207-282-3487 office	
Executive Dir	Carole Brush	207-284-9260 office	303-877-8337 cell

Unitil, the gas utility holding the ROW for the entire length of the proposed ET, has adopted a uniform lock policy as well and as of 7/09/09 was utilizing a 57 lock. Unitil had supplied keys to ETMD for their use in duplicating and/or accessing the trail; but discontinued that policy as of 10/01/10. Unitil local representatives listed below are the primary contacts for ETMD with the corporate representative as a backup. Any issues involving Unitil locks shall be reported to the ETMD President and Executive Director as well as directly to the appropriate Unitil contact.

GSGT (Unitil) Local Reps:

Chris Sullivan	603-396-3566 cell	603-221-1467 pager
Shawn LaChance	603-235-1947 cell	603-221-1464 pager

Unitil Corporate Contact:

Patty Quinn	603-235-7335 cell	603-773-6427 office
